

# SMS

---

Agiloft has integrated with [Twilio's](#) messaging platform to provide SMS services. SMS in Agiloft can be used to send bulk messages to any number of recipients, or as an authentication method with two-factor authentication.

To configure SMS, navigate to **Setup > Email and SMS**.

SMS settings

The following topics will help you to manage the setup and use of SMS:

[Configuring SMS Service](#)

[Adding SMS Templates](#)

[Sending SMS Messages](#)

[SMS in Two-Factor Authentication](#)
