Calendars Table

The Calendar table is a special table used in the Power User Interface Calendar pane feature. Records in this table display as events in the Calendars for the individuals and groups that they reference. Calendar records are mostly static and do not have any default associated workflow, rules, email setup, saved searches or charts.

The Calendar pane is only available to power users, and cannot be made available to end users.

By default, only members of the Admin, Project Manager and Support Staff groups may create Calendar records, and Project Manager and Support Staff may only view their own. No other groups have access to view Calendar entries by default, so other power user groups using the Calendar pane must be individually activated or given view and edit permissions.

Records in this table are owned by their creators, and are linked to the creator's login.
