

# Definitive Media Library

The Definitive Media Library table holds information about how and where software applications are stored. It is visible in a related table within a configuration item record when the CI Type is Software. The table appears below the SLA and license information on the Details tab of the configuration item. It is an optional table that appears only if the function is turned on in the ITIL Functions table.

### SLA and Responsible Team

CI Responsible Team	Desktop Applications Team		
CI Responsible Team Leader		CI Responsible Team Company	
Type of License	Free license	Number of Licenses	50
Version	1.5
