

Agiloft Contract Assistant for Outlook

Agiloft is available as an add-in for Microsoft Outlook, which allows users to create or interact with Contract records directly in Outlook.

You can accomplish a lot with the Outlook app, such as:

- Add attached files, notes from the email body, and more to existing records in Agiloft
- Send attachments from Agiloft in outgoing emails
- Record third-party email correspondence automatically

For more information, consult the resources below.
